"FIRST RATE"

"practical in approach, well documented and stimulating"

"a major contribution to the field"

**MANAGEMENT IN THE PUBLIC SERVICE**

**The Quest for Effective Performance**

By JOHN D. MILLETT

President, Miami University

*McGRAW-HILL SERIES IN POLITICAL SCIENCE*

*Comments typical of the high praise accorded this book . . .*

"Factual, detailed and complete with respect to most of the central problems faced by any public administrator."

James A. Perkins, Carnegie Corporation of New York

"I particularly like the way the author handles the newer theories in the field, giving them adequate treatment without indulging in doctrinaire rejection or uncritical acceptance."

Professor David B. Truman, Columbia University

*About the book . . .*

MANAGEMENT IN THE PUBLIC SERVICE is a systematic treatment of the role of management in the public service from the point of view of the operating official, primarily that of the department head. At the same time, emphasis throughout is on the public or governmental aspects of management. No specific attention is given to the multitude of various tasks undertaken by the government. Instead, focus is on the common aspects of management; the work of management which must be performed regardless of the peculiar nature of the substantive work involved. Thus the book adheres to a fundamental concept: *that the chief objective of the common work of management is the effective performance of service.*

417 pages $5.50

"the best"

**IDEAS AND ISSUES IN PUBLIC ADMINISTRATION**

**A Book of Readings**

By DWIGHT WALDO, University of California, Berkeley. *McGraw-Hill Series in Political Science.* 462 pages, $5.50

A book of supplementary readings for the introductory college course in public administration. Although designed to be used with a textbook in public administration, it stands by itself as an introduction to the major areas of the subject. While covering subjects included in most general courses, the book also explores major trends, theories, and controversies at greater length than most textbooks permit. There is some representation of differing points of view on matters which intelligent and experienced men disagree. Emphasis is on the ideas and issues of public administration. To this end some simple, factual information is avoided in favor of material dealing with the ideas behind the facts and the controversies that make public administration a vital, interesting field of study. Pungent and lively notes by the author introduce the readings, provoke thought, exploration, and questions of interest.
